

Do you have
questions about
how your child is
playing, learning,
or developing?

***We are here
to help!***

EARLY
STAGES

Early Stages is an evaluation center for children aged 2 years 8 months to 5 years 10 months.

We identify developmental delays and disabilities in children.

We provide evaluations for DC children who are not in school or who are homeschooled. We evaluate children living outside of DC if they attend a private school or childcare center in DC. Early Stages is a program of DC Public Schools (DCPS). All our services are free.

1125 New Jersey Avenue NW
Washington, DC 20001

The experts at our family-friendly centers work with you to identify your child's progress in these areas:

COMMUNICATION (Speech and Language): how your child speaks, understands, and uses language

EARLY LEARNING (Thinking, Problem-Solving, and Academic Skills): how your child learns and uses information

PHYSICAL DEVELOPMENT (Movement, Fine Motor Skills, and Sensory Processing): how your child moves, sees, and hears; how your child uses the small muscles in their body; how your child uses their senses

SOCIAL-EMOTIONAL DEVELOPMENT: how your child relates with others and how their behavior affects their daily life
